

Hiroaki Ozawa

Executive Vice President for Education and International Affairs

Director of the Forum for Graduate School Educational Reform 2025

We would like to express our sincere gratitude for the opportunity to host the Forum for Graduate Educational Reform 2025 here in Chiba.

Through this forum, we hope to offer doctoral students two meaningful encounters.

The first is an encounter with the world beyond academia.

This forum will highlight the diverse careers of doctorate holders working not only in academic research, but also in industries, government agencies, and startups. We hope that exposure to these real-world examples will inspire current doctoral students to broaden their perspectives and begin envisioning their own careers in their own words. The forum's theme, "Unlocking the Potential of Doctorates, Shaping the Future of Society," reflects this aspiration.

The second is an encounter with students from different disciplines.

Through interdisciplinary student sessions, the forum will provide an opportunity to apply doctoral learning to real-world social challenges. By bringing together diverse expertise, engaging in team-based discussions, and presenting their proposed solutions, participants will gain a valuable experience that goes beyond the boundaries of their individual fields—a unique and enriching part of their doctoral journey.

It is our earnest wish that this forum will inspire rich discussions and new perspectives on the value of doctoral learning and its role in shaping a better future.

Reception 18:15~19:30

▶ Day 1 Friday, December 12 | 13:30~18:00

Closing Remarks

Keynote Speech Friday, December 12

Speakers

Yoshinori Hirai

Representative Director, President and CEO AGC Inc.
Earned a Ph.D., in Engineering (The University of Tokyo).

Joined Asahi Glass Co., Ltd. (currently AGC Inc.) in the same year and was assigned to the Research Center. In 2008, he became the Vice President of (then) Optrex, a subsidiary that manufactured liquid crystal panels, and in 2011, he became

the General Manager of AGC's Business Development Division. After serving as CTO from 2016, he assumed his current position in January 2021. He teaches several times a year as a specially appointed professor at Kyoto University. When he was a student, he wanted to be a physicist.

Featured Guest Talk Saturday, December 13

Yoichi Ochiai

Director of Research and Development Center for Digital Nature Associate Professor, University of Tsukuba

After studying Media Arts at the University of Tsukuba, he obtained a Ph.D. from the Interdisciplinary Information Studies program at the University of Tokyo. He currently serves as Director of the Digital Nature Development Research Center and Associate Professor at the Faculty of Library,

Information and Media Science, University of Tsukuba, as well as CEO of Pixie Dust Technologies, Inc.

His expertise lies in applied physics and computer science, with multiple research papers accepted at prestigious international conferences such as SIGGRAPH. He was awarded the 2025 Minister of Education, Culture, Sports, Science and Technology (MEXT) Commendation for Science and Technology in the Public Understanding Promotion Category, and the 2023 MEXT Young Scientists' Award. He advocates for "Digital Nature," a concept of computational nature that envisions a new natural environment reconstructed through the fusion of computational and non-computational resources. His work contributes to the development of technologies aimed at realizing and implementing this concept in society.
